

## Chapter 4 – Eye and orbital contents

The fees allowed for cataract removal, by whatever means, includes subconjunctival injection and injection into the anterior chamber where required. These should not be charged as separate procedures.

When it is necessary to convert a phacoemulsification procedure into an extra capsular extraction procedure, this should be charged as a single procedure.

The code for the ‘removal of corneal sutures’ is only to be used after a keratoplasty procedure.

We do not cover blepharoplasty procedures, and these should not be coded as a correction of ptosis/eyelid reconstruction procedure.
